Art Unit: 2878

This is in response to Applicants' amendment filed January 29, 2002.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 32-48 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The present specification fails to provide an adequate support for the specific detailed operation/function of the control system, as claimed in claims 32 and 41, which controls the signal from signal stream to substantially charge one of the signal buses which is not being currently read at the output (claim 32) and allowing the signal from the signal streams to substantially charge one of the signal buses that is not being read at the output while other one of the signal is being read (claim 41). The exact manner of how the above mentioned operation being achieved has not been clearly defined and or discussed in the present specification.

Claims 32-48 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112 set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1) Liu 6,172,352 discloses an image sensing system including a control device controlling a plurality of readout switches.

Applicant's arguments with respect to claims 32-48 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
